SOFTWARE / SYSTEMS / SOLUTIONS

Build what works.

Custom websites, practical software and connected workflows, designed to make complex work simpler.

01 / INTRODUCTION

I'm Affiq Rahman, an independent developer working across full-stack web development, systems architecture and workflow automation. I build thoughtful digital tools for real business needs, with an emphasis on clarity, maintainability and reliable delivery.

02 / WHAT I BUILD

FOCUSED SOLUTIONS

01 —

Custom Websites

Responsive, carefully crafted web experiences built around the business and its audience.

02 —

Business Systems

Purpose-built software and interfaces for operational tasks, information and workflows.

03 —

Workflow Automation

Useful automation and integrations that reduce repetitive steps in everyday work.

03 / HOW I WORK

STRUCTURED BY DESIGN

DISCOVER → **DESIGN** → **BUILD** → **VERIFY**

04 / PROOF OF WORK

Selected *work*.

Explore the live platform, working demonstration and current client preview.
